Physical Education Key Stage 4

Term		Year 10/11 – One Year GCSE	
	Topic	Knowledge	Skills/Assessment
Term 1	Assessment of Analysing and Evaluating Performance (J587/05) — For the purpose of assessment, learners are required to demonstrate their ability to analyse and evaluate their own practical performance or that of a peer in order to: • analyse aspects of personal performance in a practical activity • evaluate the strengths and weaknesses of the performance • produce an action plan which aims to improve the quality and effectiveness of the performance.	Through the teaching of the practical activities and the theory content of the specification, learners should be able to identify aspects of their performance that are skilful and those that are not. They should be able to recognise strengths and weaknesses in performance and be able to suggest ways in which weaknesses might be improved using appropriate, progressive training or practice methods, which will lead to improvements in the aspects of the performance identified. Students will be taught the relevant sections of the theory content in component 01 and 02.	The AAEP will be completed as part of a controlled assessment. Learners will be marked on their overall performance against the criteria using a best fit approach. Students will be given a mark out of 20 and this will work to 10% of their overall grade. Students are assessed on Assessment objective 4 - Analyse and evaluate performance.
Term 2	PAPER 1 The structure and function of the skeletal system (1.1a) The structure and function of the muscular system (1.1b)	Learners will be able to name and locate the major bones of the body and be able to apply examples of how the skeletal system allows the functions such as posture and protection. Learners will be able to identify major joints along with the associated articulating bones in the knee, elbow, shoulder and hip. Knowledge will be developed of the types of movement at hinge joints and ball and socket joints, as well as being able to apply these movements to examples from physical activities and sports. Learners will develop their knowledge of the location of the major muscle groups and be able to apply muscle use to examples from physical activities and sport. Learners will also develop their knowledge of the roles of muscles as agonists, antagonists, fixators and also how they	Within lessons students will complete exam questions, with the majority of these being long answer questions which are marked in line with the marking policy giving students a strength, target and action. Students are then given time in lessons to purple pen and improve their work. Throughout the course of the year students will complete end of topic tests. This is a formative assessment that allows us to identify any gaps in students' knowledge. From this, students are set individualised homework based on the topics that were highlighted as their weaknesses. Students will also sit summative assessments over the course of the year in line with the mock exam timetables.

Mov	/emei	nt ana	lysis	(1.1c)	
End	of to	pic tes	t con	npleted	ł

operate as antagonistic pairs, again by applying to examples from physical activities and sports.

Learners will develop their knowledge of the three classes of lever and will be able to use examples from physical activities and sport to show where these levers might operate to produce movement. Learners will become aware of the mechanical advantage provided by levers in movement. Learners will know the three planes of movement and be able to give examples of these levers from different physical activities and sports. Frontal, transverse and longitudinal axes of rotation will be recognised by learners who will be able to apply these to examples from physical activities and sports.

Cardiovascular System (1.1d)

Learners will develop their knowledge and understanding of the structure and function of the cardiovascular system. Blood vessels and blood cells with their pathway through the heart will be understood along with definitions of key cardiac terms. Learners will understand the pathway of air through the respiratory system and know the role of the respiratory muscles and alveoli during breathing, along with an understanding of key definitions. Learners will also be able to define aerobic and anaerobic exercise and be able to give practical examples of aerobic and anaerobic activities

Effects of exercise on the body systems (1.1e) End of topic test completed

Learners will develop their knowledge and understanding of the short and long-term effects of exercise on muscles and bones, the heart and the respiratory system. They will be able to apply understanding of these effects to examples from a range of physical activities and sports. Learners will be able to collect and use data in this section related to both short-term and long-term effects of exercise.

Students are assessed on the following objectives in any written exam

AO1 - Demonstrate knowledge and understanding of the factors that underpin performance and involvement in physical activity and sport.

AO2 - Apply knowledge and understanding of the factors that underpin performance and involvement in physical activity and sport.

AO3 - Analyse and evaluate the factors that underpin performance and involvement in physical activity and sport.

PAPER 2 – Engagement patterns of social groups (2.1a)	Learners will develop their knowledge and understanding of current participation trends using a range of valid and respected sources. The factors affecting participation for a range of different groups in society will be understood, along with strategies to promote participation, using practical examples from physical activities and sports.
Commercialisation of sport (2.1b) End of topic test completed	Learners will develop their knowledge and understanding of the commercialisation of physical activity and sport including sponsorship, along with the influences of the media with examples showing the positive and negative effects on participation and performance in physical activities and sports.
Ethical and Sociocultural issues (2.1c) End of topic test completed	Learners will develop their knowledge and understanding of ethics in sport including definitions of the key terms of sportsmanship, gamesmanship and deviance. The effects of drugs in sport and the reasons why sports performers use drugs will be understood along with reasons for player violence with practical examples in physical activities and sports.
PRACTICAL	Students complete a range of practical lessons looking to refine their skills and develop tactical play. During these lessons the teacher will be looking and assessing their sporting ability to provide a practical score for each student. Football
	Rugby
	Netball

PAPER 2 –
Sports Psychology (2.2)
End of topic test completed

can affect performers. They will also develop their knowledge and understanding of how movement skills are learned and performed in physical activities and sports. The characteristics and classification of skilful movement will be understood, along with the role of goal setting and mental preparation to improve performance in physical activites and sports. Learners will develop their knowledgee and understanding of guidance and feedback that affects the learning and performance of movement skills. Learners will be able to identify key terms and describe psychological concepts, using practical examples from their own performances. Learners will show that they can explain and evaluate sports psychology theories and principles and be able to apply theory to practice.

Learners will develop their knowledge and

understanding of the psychological factors that

Health, fitness and well-being (2.3) End of topic test completed

Learners will develop their knowledge and understanding of the benefits of participating in physical activities and sport to health, fitness and well-being as well as having a clear definition of health and fitness. Learners will know about the physical, emotional and social benefits as well as the consequences of a sendentary lifestyle. Learners will develop their knowledge and understanding of diet and nutrition. Learners will understand the main components of a balanced diet, including the effects of these components and hydration on performers using a range of examples from physical activities and sports.

Revision techniques and exam preparation PRACTICAL

PREPARATION FOR MODERATION

	Topic	Knowledge	Skills/Assessment	Topic	Knowledge	Skills/Assessment	Topic	Knowledge	Skills/Assessment
Term 1	Practical: Football Practical:	Students will build on skills that have been developed in Y7, 8 and 9. Students need to demonstrate core and advanced skills in isolation and under competitive pressure. Students will practice and develop their accuracy, control and fluency with the sport's specific skills. Students will develop their decision making and tactical awareness of selecting and using appropriate skills. Applying team strategies, develop a good understanding of the rules. Students will build	Skills that are covered: Core: Ball control (using feet) Passing Shooting Dribbling Heading Tackling Marking Advanced: Ball control (chest/thigh) Non-dominant foot passing Shooting (volleys and swerve) Dribbling Heading Marking Decision making and tactical awareness Assessment: students are assessed using the OCR assessment criteria for practical performances	Practical: Football	Pupils will focus on developing more advanced skills and apply them in game situations in order to outwit opponents. Pupils will work in groups, taking on a range of roles and responsibilities to help each other prepare and improve as a team. To develop a deeper understanding about healthy lifestyles and detailed decision making.	Defensive skills Passing Use of width Defending and attacking corners Set pieces Role of the referee Students are assessed based on their engagement	Practical: Couch to 5K	Students will take part each week in a running session that will gradually build up each week. Students will develop an understanding around the importance of staying active and the benefits of running.	Physical resilience Cardiovascular fitness Running technique Pacing Students are assessed based on their engagement

They will build knowledge around what a leader looks like and the characteristics and skills needed to be a leader. Students will work in teams to develop their team work and communication	Students will cover: Characteristic of a leader Team work Communication Session planning and delivering Students are assessed based on their engagement

	selecting and using appropriate skills. Applying team strategies, develop a good understanding of the rules.			team. To develop a deeper understanding about healthy lifestyles and fitness.		to plan their own sessions which they will then deliver to the rest of the groups.	
Practical: Trampolining	Students will build on skills that have been developed in 9. Students need to demonstrate core and advanced skills in isolation and under competitive pressure. Students will practice and develop their accuracy, control and fluency with the sport's specific skills. Students will develop their decision making by creating and performing 2 routines. Develop a good understanding of the rules.	Skills that are covered are: Core skills, to include: Shape Twists Rotational Combined movements Advanced skills Back to front Front to back Half turntable Cradle Front somersault (tucked) Back somersault (tucked) Decision making and application of compositional ideas/choreography Assessment: students are assessed using the OCR assessment criteria for practical performances	Practical: Uni Hoc	To develop the use of game tactics and experiment with the success of these to help improve as a team. To undertake a range of roles and responsibilities to help each other improve and independently officiate and coach small sided games. To develop a deeper understanding of the importance of teamwork, communication and healthy active lifestyles.	Passing/Receiving Shooting Dribbling Ball control Defending/Tackling Students are assessed based on their engagement		

				Practical: Badminton	Pupils will focus on developing more advanced skills and apply them in game situations in order to outwit opponents. Pupils will prepare mini tournaments and compete in them. They will work in groups taking on a range of roles and responsibilities to help each other to prepare and improve as a team. To develop a deeper understanding about healthy lifestyles and fitness.	Serving Overhead clear Backhand clear Drop shot Smash shot Role of the umpire Students are assessed based on their engagement	Practical: Inclusive Sports	Pupils will focus on building their knowledge and understanding of a range of inclusive sports. They will learn the skills required for each sport. They will then use skills learnt from the leadership strand to run mini tournaments in these sports.	Skills Covered: Boccia Goal Ball Curling Students are assessed based on their engagement
Term 3	Practical: Badminton	Students will build on skills that have been developed in Y7, 8 and 9. Students need to demonstrate core and advanced skills in isolation and under competitive	Skills that are covered: Core skills Serving Return of serve Forehand shots Teamwork and communication with partner (doubles only) Advanced skills	Practical: Lacrosse	To develop the use of game tactics and experiment with the success of these to help improve as a team. To undertake a	Grip Shooting Passing Catching Use of space Teamwork	Practical: Orienteering	Pupils will refine and demonstrate individual and group skills.
